

# aanloop ai

**The complete brand identity system for Aanloop AI — covering wordmark, color, typography, and application rules.**

**Concept.** The wordmark uses Inter Bold with tight tracking, anchored by a four-segment connected accent band. The Dutch word *aanloop* means "runway" or "takeoff" — the accent stripe nods to that momentum. The four colors represent the four phases of an AI workflow: **capture, reason, act, learn**.

**Positioning.** Aanloop AI is a professional B2B AI company serving Dutch SMEs. The identity balances multi-color vibrancy (signaling intelligence and approachability) with restrained typography and a refined accent treatment (signaling reliability and competence).

# The system at a glance

## Primary horizontal — light backgrounds

Use on white, off-white, and light surface backgrounds (#FFFFFF to #F1F5F9). This is the default lockup for most applications: website headers, business cards, presentations, email signatures.

**aanloop ai**

## Primary horizontal — dark backgrounds

Use on dark surfaces (#0B1120 to #1E293B). Always pair with sufficient contrast — never reduced opacity or screen blends. The four accent colors remain unchanged for brand consistency.

**aanloop ai**

## Square mark — avatars, app icons, compact spaces

The "aa" monogram with the same accent band, in 1:1 format. Use anywhere a square crop is required: social media avatars, browser favicons, app launcher icons, watermarks.

**aa**

# Four accent colors, two neutrals

The accent color order is fixed: **Indigo** → **Rose** → **Amber** → **Emerald**, always left-to-right. This sequence builds visual rhythm across applications and is part of the brand's recognizable signature.

## Navy

PRIMARY TEXT ON LIGHT BACKGROUNDS

RGB 15 / 23 / 42

CMYK 88 / 79 / 47 / 80

## Indigo

BRAND ACCENT · POSITION 1

RGB 67 / 56 / 202

CMYK 81 / 84 / 0 / 7

## Rose

BRAND ACCENT · POSITION 2

RGB 225 / 29 / 72

CMYK 0 / 87 / 65 / 12

## Amber

BRAND ACCENT · POSITION 3

RGB 217 / 119 / 6

CMYK 0 / 47 / 100 / 15

## Emerald

BRAND ACCENT · POSITION 4

RGB 4 / 120 / 87

CMYK 88 / 0 / 50 / 25

## Pearl

PRIMARY TEXT ON DARK BACKGROUNDS

RGB 241 / 245 / 249

CMYK 4 / 2 / 0 / 2

*CMYK values are approximations for digital printing. For high-end print runs (offset, packaging), request a designer to match against a specific profile (Fogra39 for European coated stock).*

# Typography

**Inter** by Rasmus Andersson. Open source, available via Google Fonts and [rsms.me/inter](https://rsms.me/inter). The wordmark uses weight 700 (Bold) with letter-spacing of  $-4.5$  (or  $-0.0375em$ ) — tight, modern, premium. Body copy and UI throughout the brand should use Inter Regular (400) and Medium (500). Do not substitute another typeface, even visually similar ones.

|                                             |                                        |
|---------------------------------------------|----------------------------------------|
| <b>aanloop ai</b>                           | WORDMARK · INTER 700 · $-4.5$ TRACKING |
| <b>The quick brown fox</b>                  | HEADLINES · INTER 700                  |
| The quick brown fox jumps over the lazy dog | BODY COPY · INTER 400                  |

## Do's & Don'ts

| ✓ DO                                                                                | ✗ DON'T                                                                     |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------|
| Use the light version on light backgrounds and the dark version on dark backgrounds | Recolor the wordmark or accent stripes — the four colors are fixed          |
| Maintain the original aspect ratio when scaling                                     | Reorder the accent colors — sequence is always Indigo, Rose, Amber, Emerald |
| Leave clear space equal to the height of the lowercase "a"                          | Stretch, skew, rotate, or distort the logo                                  |
| Use SVG on the web for crisp rendering at every density                             | Add drop shadows, glows, outlines, or any effects                           |
| Use the square mark for any 1:1 placement (avatars, favicons)                       | Place the logo on busy photographic backgrounds without an overlay or card  |
| Pair with WCAG AA contrast (4.5:1) or higher                                        | Substitute a different typeface, even one that looks similar                |

# Minimum sizes & files

Below the minimum sizes, the accent stripe becomes illegible. For very small applications, use the favicon or the wordmark without the stripe.

| Asset           | Min. digital | Min. print |
|-----------------|--------------|------------|
| Horizontal logo | 120 px wide  | 25 mm wide |
| Square mark     | 24 px        | 8 mm       |
| Favicon         | 16 px        | n/a        |

## File index

| File                            | Format | Use case                                         |
|---------------------------------|--------|--------------------------------------------------|
| logo-horizontal-light.svg       | Vector | Web header, business card, deck, email signature |
| logo-horizontal-dark.svg        | Vector | Dark-mode UI, dark-themed marketing              |
| logo-mark-light.svg             | Vector | Square avatar (light), secondary brand element   |
| logo-mark-dark.svg              | Vector | Dark social avatar, watermark on dark imagery    |
| app-icon-light.svg              | Vector | iOS / Android / desktop app launcher icon        |
| logo-horizontal-light-2048.png  | Raster | Print, presentations, retina web                 |
| logo-horizontal-dark-2048.png   | Raster | Dark mode equivalent of above                    |
| logo-mark-{light,dark}-1024.png | Raster | Square crop avatars (LinkedIn, Slack, etc.)      |
| favicon-32.png · favicon-16.png | Raster | Browser tab favicons                             |
| favicon-180-apple-touch.png     | Raster | iOS home screen icon, Safari pin                 |

*Always prefer SVG when the medium supports it (web, modern email clients, deck tools). Use PNG only when SVG isn't supported (some legacy print software, social media uploads).*
